## SECTION 4 Questions 31-40

Complete the notes below.

Write ONE WORD ONLY for each answer.

| Ep | isodic memory   |
|----|---|
| •  | the ability to recall details, e.g. the time and 31 of past events  |
|    | different to semantic memory – the ability to remember general information about the 32, which does not involve recalling 33information |
| Fo | rming episodic memories involves three steps:   |
| En | coding  |
|    | involves receiving and processing information   |
| •  | the more <b>34</b> given to an event, the more successfully it can be encoded   |
|    | to remember a 35, it is useful to have a strategy for encoding such information   |
| Со | nsolidation   |
|    | how memories are strengthened and stored  |
|    | most effective when memories can be added to a 36of related information   |
|    | the 37 of retrieval affects the strength of memories  |
| Re | trieval   |
| •  | memory retrieval often depends on using a prompt, e.g. the 38of an object near to the place where you left your car                     |
| Ep | isodic memory impairments   |
|    | these affect people with a wide range of medical conditions   |
|    | games which stimulate the 39 have been found to help people with schizophrenia  |
|    | children with autism may have difficulty forming episodic memories – possibly because their concept of the 40 may be absent             |
|    | memory training may help autistic children develop social skills  |
